AMENDMENT A

Dear Sirs:

This amendment has been filed in response to the first office action mailed 3/13/03.

Kindly amend the claims as follows.

Please add the following claims:

1. (amended) A tubing member for use with waste water management, comprising:
a main hollow body, having a first and second ends;
a rectangular photoreactor plate placed in communication with said first end;
a series of bracing members attached to the exterior of said main hollow body so as to support and prevent damage to said photoreactor plate;
a generally rectangular slotted opening in fixed communication with said first end to receive said rectangular photoreactor plate;
and
a series of tubing communicating with said second end of said main body.
